Subject: Application for Reimbursement of Conference Fees

Dear Madam,

I am writing to request the reimbursement of the fees I incurred while attending the "International Conference on Advanced Materials for Sustainable Innovation (IC-AMSI 2024)", which took place on 29th August at School of Engineering and Technology, Vivekananda Institute of Professional Studies- Technical Campus, Delhi, India. This conference was directly related to my role as Assistant professor (ECE) and the knowledge and insights gained will significantly contribute to my work in VLSI.

The total amount paid for the conference registration was 3500 Rs, and I have attached the Receipt of payment for your reference:

I kindly request you to process this reimbursement at your earliest convenience. 50%.

Subject: Fees reimbursement for Patent filing in the name of MAIT

Four faculties of CSE department – Prof Neelam Sharma, Prof Namita Gupta, Dr Farzll Kidwai, Mr Anupam Kumar, Mr Alok Sharma developed an automated tool that would help to minimize the damage caused to washing machine due to overloading. The objective of the invention is to avoid damage caused to washing machine due to overloading of tub in fully automatic machines. The device proposed will consists of an ESP controller along with weighing and temperature sensors connected to voltage relay that would be controlled by the micro-CPU.

Applicant of the Patent: Maharaja Agrasen Institute of Technology

The inventors of the novice tool are:

1. Prof Neelam Sharma, Director, MAIT
2. Prof. Namita Gupta, HoD CSE
3. Dr. Farzll Kidwai, Asst. Prof. CSE
4. Mr. Anupam Kumar, Asst. Prof. CSE
5. Mr. Alok Sharma, Sys. Adm./Asst. Prof. CSE

The key points to the invention are:

1. Load cell to weigh the machine continuously for optimal performance
2. Temperature sensors to measure the temperature for optimal performance
3. ESP controller connected would manage the sensors and would be connected to the solid-state voltage relay for power cut-off in case of any values of the sensors going out of bounds.

Innovation benefits:

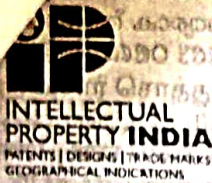

1. Currently there is no product that is available in the market.
2. The proposed product would benefit any consumer that uses the washing machine.
3. The problem of overloading of washing machines accidentally by the consumer, which leads to irreparable damage to the product, the invention would help to alert user and in case machine do starts operation then the CPU controller would disconnect the device from the main line to stop the overall operation of the washing machine.

For filing the patent, we would require Patent Attorney that would file the patent in India Patent Office. The fees for filing and publishing the patent in the name of "Maharaja Agrasen Institute of Technology" would be around 26,000/- (Twenty-Six Thousand only).

Submitted for your kind consideration and approval.

(57) Abstract :

The present disclosure discloses a load sensing module (100) for a load machine. The load sensing module (100) includes a plurality of load cells (102) placed at a distance from each other which determine load weights during running condition of the load machine. If the average load weight of the load machine is beyond a pre-defined loading capacity of the load machine, a microcontroller unit (106) sends signal to a solid-state relay (108) to shut down operating condition of the load machine.

(57) Abstract :

ABSTRACT COGNITIVE ULTRASONIC ASSISTIVE SYSTEM AND A METHOD THEREOF In an aspect, the present disclosure discloses an ultrasonic assistive system (100) for assisting visually impaired individuals in navigating their surroundings safely and assessing fall risk and a method (200) thereof. The system (100) includes micro-Chips and micro-Sensors that emit high-frequency sound waves and uses AI algorithms to interpret the echoes and provide real-time feedback to the user. The system (100) offers real-time feedback to visually impaired individuals, facilitating safe navigation within their surroundings and implementing an automatic emergency services contact system in the event of a fall risk. Such a feedback can be in the form of haptic sensations, auditory alerts, or verbal cues. Figures 1 and 2
